

CAMP YAKETY YAK PROTOCOLS & POLICIES IN RESPONSE TO COVID-19

Based on state and local guidelines, Camp Yakety Yak's (CYY) 2022 programs will operate under the following protocols this summer. As guidelines on local social distancing, gathering size limits, and youth activities change, these protocols are also subject to change accordingly. All CYY camp programs will be run with strict gathering size limits both indoors and outdoors, based on facility size. While some activities and programs will look different than in the past, they will still be designed to provide a fun, social, and skill-building experience for each camper. More than ever, safety is our top priority!

The Camp Yakety Yak Leadership team will make decisions based on the unique conditions and guidelines for each camper and community we serve.

Home Screening

In an effort to ensure that we keep all campers and staff as safe as possible, please keep your child home if they exhibit any of the following:

Primary symptoms

- Fever 100.4
- Chills
- Cough
- Shortness of breath/trouble breathing
- New loss of taste or smell

Non-primary symptoms

- Headache
- Nausea
- Diarrhea
- Fatigue
- Sore throat
- Muscle/body aches
- Congestion or runny nose

If your child demonstrates any of the primary or non-primary symptoms listed above, it is best to err on the side of caution and keep your child at home.

Camp Screening

At drop off there will be a check in certifying that your camper/s are feeling well and have no primary or non-primary symptoms and have had no contact with someone with symptoms.

Campers and staff will be visually screened daily during drop off. Throughout the day at camp there will be visual checks for campers that may begin to feel unwell and develop primary or non-primary symptoms, campers do not need to be asked any questions prior to entering their learning space. If a student has any unusual coloration, chills, unusual behavior, new or significant coughing, shortness of breath, or reports any symptoms of illness, they will be kept in a location away from others so the CYY team can contact parents for pick up.

In an effort to care for the safety of our community, we ask the following::

If your child has another illness documented other than Covid-19

- Remain at home for at least 24 hours after illness onset
- Fever free/symptom free for 24hrs without the use of medication

If your child has had a positive COVID-19 Test

- Remain at home for at least 10 days after illness onset, or MAY need to have a negative covid test to return,
- and fever free for 24hrs without the use of fever reducing medicine

If your child has had a negative COVID-19 Test AND is fever free:

- Fever free for 24hrs without the use of fever reducing medicine

If you do not undergo viral testing

- Remain at home for at least 10 days after illness onset and be symptom free
- Fever free for 24hrs without the use of fever reducing medicine

Contact with Positive & Presumptive Case

If Camp Yakety Yak is notified of a camper, volunteer, intern, or staff member testing positive for COVID-19 or of having a presumptive COVID-19 case (has at least two of the following COVID-19 symptoms: shortness of breath, cough, fever, new loss of smell or taste; AND had close contact with a confirmed case in the past 14 days), all families of campers and staff who have interacted with the cohort will be notified.

Following contact tracing, any campers who have been in close contact (currently defined as within 6 feet and may change with new guidance) for a cumulative time of 15 minutes over a 24 hour period) with a positive or presumptive case will quarantine for 10 days, or MAY have a negative covid test.

Any volunteers, interns, and staff members, vaccinated and non-vaccinated campers who interacted with the positive or presumptive case, but are not required to quarantine, should monitor for COVID-19 symptoms.

Physical/Social Distancing

- Stay at least 6 feet (35 sq ft) apart (subject to change with guidance) from others whenever possible
- Ensure campers keep their belongings separated from others
- Restrict all non-essential visitors and volunteers
- Do not congregate in the staff break or work rooms
- Open windows to increase ventilation whenever possible and safe

Though physical distancing is best practice, there will be times when this is not feasible. Whenever possible, limit your close contact to under 15 minutes, and wear the proper PPE.

Face Coverings/Shields

- As of 2/5/22 all campers and staff are required to wear face coverings properly, covering the nose and mouth, this will be re-evaluated closer to camp and CDC and local school guidance will be followed.
- Face shields are an acceptable alternative when a student or staff member has a medical condition that prevents them from wearing a mask or face covering, or when people need to see the student's or staff's mouth and tongue in order to communicate.

Campers who abstain from wearing a face covering, or campers whose families determine the camper will not wear a face covering, during camp will be addressed on a case by case basis, as protected under ADA.

Healthy Hygiene Practices

- All staff will teach, reinforce, and model hand washing and sanitizing across all settings.
- Posters will be placed throughout the camp as a reminder to campers and staff.

- All campers and staff are required to wash hands and/or sanitize frequently. This includes and is not limited to: before and after meals, after coming inside the building, after using the restroom, after sneezing, blowing your nose, or coughing.
- Avoid touching your face.

Disinfection In Common Spaces/Restrooms

- Given that it is a team effort, all staff will be responsible for disinfecting classrooms, common spaces and restrooms based on a rotation that will require a date/time stamp reviewed frequently by the camp directors.

- Staff may choose to use Clorox disinfecting wipes or Lysol disinfecting wipes in the classroom as they are safe to use around children and pregnant women.
- High-touch surfaces are surfaces that are handled frequently throughout the day by numerous people (door knobs, sink levers, toilet handles, etc) will also be disinfected throughout the day.
- Prior to camper arrival and after camper departure, all common areas of camp will be cleaned by staff.

Snack and Lunch Times

Campers will eat their lunch and snack in their assigned space. Handwashing will be enforced and all eating surfaces will be wiped down prior to eating snack and lunch as well as after.

Sign-in and Sign-out Procedures

For contact tracing purposes, a system will be set up to monitor and record who has contact throughout the day. More information will be available closer to camp.
